How to use your guide

BY PETER SHAW

A thriving industry has grown up around Sir Clive Sinclair's computers — to make them do more or to improve their basic features.

In this free supplement you'll find details of more than 125 additions, from keyboards to joysticks, printer interfaces to EPROMs.

It's been a big job and, because we have tried to cover as many products as possible, the reviews are brief, but with all the facts you need.

At the end of the guide you will find the names and addresses of all the companies whose products are featured.

They will be pleased to provide more information.

To help you choose, we have included ratings — five means best value. In some cases where the text says "untested" the ratings are based on the specifications and prices.

A few points to bear in mind when you are using the guide:

Each product is first named alongside the computer/s it works with.

Any opinions given below are my own, based on long experience with both the ZX81 and the Spectrum.

The prices, all including VAT, are from the companies' own literature. You may find variations in the shops. Some products are only available by mail order, so far, which may add to the cost.

Please remember that this is a fast-moving industry. Although we have made every effort to ensure accuracy, prices and specifications change rapidly. Always check before buying.

Keyboards, consoles, stands, cases

Backpack ZX81/Spectrum

Six models, all with save/load and on-off switches and space for the power supply. Top of the range also has a variable sound amplifier, three 13amp sockets, switch and neon indicator. Untested.

£27.50-£12.85

Kelwood Computer Cases

3

Wobble Stopper ZX81

Wobble stoppers are a great idea for those who get system crashes every time the Newline key is pressed. The idea is that the RAMpack is clamped firmly to the back of the computer. The prices of these may be a little steep for you, though. See also Miscellaneous section.

small flat £5.25
small tilted £6.25
large flat £5.75
large tilted £6.75

Kelwood Computer Cases

3

Keyboards/RAMPacks etc. ZX81/Spectrum

A new range from Spanish company Indescomp, all housed in good-looking glossy black boxes. Includes a novel Domestic Controller for the Spectrum which has four outputs to control alarms, lights, heating and so on. Untested. Keyboards are typewriter-style.

Spectrum keyboard £42.95
ZX81 keyboard £39.95
Domestic Controller £37.75

Indescomp

4

Console ZX81

Low-price console which will house the computer, power supply and RAM pack and could be adapted for add-ons. When not in use the ZX81 slides away inside. Untested.

£3.99

Ricky Caplan

4

Microstation/Work Station ZX81/Spectrum

The first is tray-shaped with space for computer and peripherals. The Work Station, suitable for other micros as well, is made of stove enamelled sheet metal and has on-off switch, four 13amp sockets and carrying handle. Room for peripherals and the TV stands on top. Accessories: Power Base (£10.50-£11), legs (£11) and keyboard dust cover (£2.50). Untested.

Microstation £7.50
Work Station
desk top model £49

Kelwood Computer Cases

4

Executive Case Spectrum

ABS plastic case with space for Spectrum — inclined for ease of use — power supply, ZX Printer, cassette recorder, six cassettes and spare printer paper. Lid has room for leads. A new design will hold Microdrives and earlier versions are convertible. Untested.

£47.45

Treetop Designs

3

Computer Desk ZX81/Spectrum

Made from black ABS plastic, this desk has recesses for computer and printer and the TV can rest on the top. Power supply and cables are hidden from view. Untested.

Spectrum £16
ZX81 £15

PH Scientific Products

4

● Computer Desk from PH Scientific Products

Microcase ZX81/Spectrum

Executive-style case with detachable lid to house computer, cassette recorder, power supply, ZX Printer and leads. Work station, from the same company, has space for Spectrum, recorder or Microdrive and monitor. Micro Aids also supplies other items like dust covers and planning aids. Untested.

£32.95
work station £22.95

Micro Aids

4

Console ZX81/Spectrum

Made of plywood in a choice of three finishes: light or dark mahogany or black. Space for computer, cassette recorder, power supply, printer and — in slots on the top — eight cassettes. Makers say it could also be used on the lap. Untested.

£23.50

E.R. Cameron & Son

4

AGF

PROGRAMMABLE JOYSTICK INTERFACE

for
Spectrum
or **ZX81**

MICRODRIVE
COMPATIBLE

AGF PROGRAMMABLE INTERFACE

Recognised as the only true Hardware Programmed joystick interface this product offers all the features associated with such a design.

You can use any Atari-compatible joystick controller with any software for your Sinclair Spectrum or ZX81, not just those with a joystick option.

Movement of the joystick is recognised by the computer exactly the same as pressing the appropriate control keys, and can therefore give the most immediate response to that movement. The hardware programmed design works with all possible key-reading methods, both BASIC and Machine Code.

Eight directional movement, with or without the fire button being pressed, can be achieved by only programming the left, right, up, down and fire keys required by the game.

Programming is achieved by a two-digit code, which is looked up on the Programming Chart supplied, for each direction and firing button. These two numbers are then selected on a pair of leads which are clipped onto appropriately numbered strips on the interface.

Once configured this can be marked onto a Quick Reference Programming Card for storing with the game. As the programming is not power dependent the interface can be immediately used when next switched on.

The keyboard remains fully functional and can be used simultaneously with the joystick.

An integral rear expansion connector means there is no need to remove the interface to connect other peripherals.

NB. A recent design improvement now means that the AGF Programmable Interface works with the new Quickshot II rapid "Auto Fire" feature.

KEY FEATURES

- ★ Programmable design gives TOTAL software support.
- ★ Accepts Atari, Competition Pro, Wico, Starfighter, Quick Shot, Le Stick etc.
- ★ Rear extension connector for all other add-ons.
- ★ Free demo program and instructions.

PACKAGE CONTENTS SUPPLIED

- Programmable Interface Module as illustrated, complete with clip-on programming leads.
- Self adhesive programming chart detailing how to define which key is simulated by UP, DOWN, LEFT, RIGHT, and FIRE.

- One pack of ten Quick Reference Programming Cards for at-a-glance setting to your games requirements.

- 12 months guarantee and full written instructions.

Console

Spectrum

A very cheap method, comparatively, of putting your Spectrum on a tilt — in a console with its peripherals. The ZX Printer fits alongside and the power pack goes underneath. The one disadvantage is that it also looks pretty cheap, being made of shiny black corrugated cardboard. It comes packed flat and is very easy to assemble.

£8.25

Print 'n' Plotter Products

3

Console

Spectrum/ZX81

This black plastic console limits the expansion of the computer as it hides the port underneath a hood on which the television stands. The ZX Printer can still be used. It is also a very bulky object, so you'll need a lot of space.

£31.50

Computerlock

2

Work Station

ZX81

Made of black plastic, this is quite a nice work station. But again you are limited by the spaces which are already on the console — keyboards or motherboards are out when it is in use. The printer fits in the console with the power pack underneath.

£16.50

Peter Furlong Products

4

Case

ZX81

A sturdy wooden box in which to place your ZX81. Although not thoroughly tested, I quite like the look of this one. It seems ideal for carrying your computer around.

£21

slightly larger version £22

Kalenia Wood Products

3

ZX Custom Case Spectrum/ZX81

This is the one you may have seen in W. H. Smith. It's a briefcase which will hold your Spectrum/ZX81, power pack, printer, tape recorder and cassettes, etc. There is even space for the cables. Everything is protected by foam, which you could chop away to make space for other items, like Microdrives. The case itself is executive style in black with white metal trimmings.

£38.95

Computer Cases

3

Desk Console

Spectrum

Smart-looking unit in black ABS plastic which has switches for SAVE/LOAD/RUN and power, plus a "power on" LED.

£42.18

Traffic Technology

3

Spectrum Keyboard Spectrum

Strangely enough, part of the dk' keyboard case is made of wood and part is plastic. The stick-on legends soon come off and there is no space bar. But it does have a useful numeric keypad. It is fitted by removing the Spectrum from its casing and fitting into the new unit with screws into pre-formed holes — a 15-minute job. The power pack can also fit inside, but it's easier to leave it on the outside.

£45

dk'tronics

3

Computer Keyboard

ZX81/Spectrum

The case is a bit "boxy", but the typewriter-style keyboard — angled like a real typewriter — is quite nice. Again, the computer case is removed and it screws in and there's space for the power pack. There are two versions available, with standard or metal case. Good keyboard, but you can do better for your money.

standard £35
metal £50

Computer Keyboards

3

FD42

ZX81/Spectrum

This was one of the two original replacement keyboards — the other is now obsolete. Fitting means removing the computer from its case. But it also needs a little soldering to wire up the "power on" red LED. Made of plastic, the case is black and the keys — each guaranteed for a million depressions — are white with the legends screen printed so they will not come off. For the money it is excellent value. Its one drawback is that it has not got a space bar.

£29.95

Fuller Micro Systems

4

● Smart-looking and useful desk console from Traffic Technology

JUST AROUND THE CORNER, A NEW

BLACK CRYSTAL

The Classic, six program adventure game for the 48K Spectrum and 16K ZX-81 computers. No software collection is complete without it.

"BLACK CRYSTAL is an excellent graphics adventure and a well thought out package" (Sinclair User, April '83).

"BLACK CRYSTAL has impressed me by its sheer quantity and generally high quality of presentation. I am afraid I have become an addict" (Home Computing Weekly, April '83).

SPECTRUM 48K 180K of program in six parts . . . only £7.50

ZX-81 16K over 100K of program in seven parts . . . only £7.50

Why pay more for less of an adventure?

ZX-81 COMPENDIUM

Alien Intruder, Wumpus Adventure, Numerology, Hangman, Hieroglyphics, Movie Mogul.

The ideal software package for all 16K ZX-81 owners. Six major programmes on two cassettes for only £6.50.

"Alien Intruder/Hieroglyphics — Both programs make good use of graphics and words to make a very entertaining package." (Sinclair User, Aug '82)

"Alien/Hieroglyphics/Wumpus/Movie — A varied mix from Carnell, all featuring imaginative responses and graphics and all of them good games for all ages (Hieroglyphics is particularly good for children)." (Popular Computing Weekly, Aug '82)

THE ADVENTURES OF ST. BERNARD

An exciting, fast moving, machine code, arcade game where you guide your intrepid St. Bernard through the perils of the icy wastelands to rescue his Mistress from the clutches of the abominable snowman. 48K Spectrum £5.95.

SEAFORCE ONE

Take on the robot guardians of the central computer in a superbly stylised three dimensional battle game. 48K Spectrum £5.95.

(100% MACHINE CODE ARCADE ACTION)

THE CRYPT

written by Stephen Renton

Prepare yourself for the many challenges that shall confront you when you dare to enter "THE CRYPT".

You will battle with giant scorpions, Hell spawn, Craners, Pos-Negs and if you are unlucky enough — the Dark Cyclops in this arcade style adventure.

Available now for the 48K Spectrum @ £4.95

THE DEVIL RISES IN

I uttered the last incantations as the clock struck thirteen. All fell silent except for a faint rustling in the corner. From out of the shadows they came, all Hell's fury against me but I was not defenceless until the Angel Of Death, astride a winged horse, joined the battle. Avoiding his bolts of hell fire, I took careful aim. My chances were slim, but if my luck held . . . 48K Spectrum £5.95.

(Fast moving, machine code, all action, Arcade game)

RANGE FROM CARNELL SOFTWARE

COMING SOON "THE WRATH OF MAGRA"

The first born has been destroyed. The Black Crystal of Bezoth has been banished. The alliance of Evil has been defeated by the armies of Lord Tindal. So ends the Third Age. Now we invite you to write your name in the history of the Fourth Age of the Third Continent.

You will meet friends and enemies, old and new, in the long awaited sequel to Volcanic Dungeon. Using high resolution graphics and combining the best qualities of "Black Crystal" and "Volcanic Dungeon", we will allow you to become part of this tale of revenge.

"The Wrath Of Magra" comes as three, 48K programs on cassette, boxed with instruction manual and book detailing the history of the Third Continent and the many spells you will be using throughout the game.

NOTE: "The Wrath Of Magra" is a complete adventure. You need not buy "Volcanic Dungeon" or "Black Crystal" to play it.

Available through most good computer stores or direct from:
Carnell Software Ltd, North Weylands Industrial Estate, Molesey Road, Hersham, Surrey KT12 3PL.
Dealers: Contact us for your nearest wholesaler.

CARNELL SOFTWARE LTD

FDS

Spectrum

Although there have been many production problems, the FDS keyboard is finally here. It was well worth the wait. Moulded in black plastic, it has grey, black and red keys — and the legends are professionally screen printed so they should not come off for ages. And the FDS keyboard has all the keys you want, too: a full space bar, extra cursor keys, delete keys and extended mode button. Looking a little like the Lynx, it is sturdy and it is easy to fit the uncased Spectrum inside. It will also take Microdrives, the power pack, and other add-ons from Fuller and other companies. All in all, the FDS is the best keyboard for the Spectrum.

£49.95

Fuller Micro Systems

5

ZXR Push-Button Keyboard

ZX81

This keyboard sticks firmly on top of the original ZX81 keyboard providing a Spectrum-like feel. A much-improved design from the company's earlier Button Set, all the rubber-like keys are clearly printed with exact reproductions of the original legends — unlike some other add-ons. It includes an overlay and stick-on labels so you can tailor the keyboard for particular applications, games for example. A good idea and well worth buying if you cannot afford the full-blown, all-singing, all-dancing keyboards mentioned here.

£9.95

Filesixty

5

Keyboard and Buffer

ZX81

The keyboard is not thrilling, but it does have the advantage that you do not have to take your ZX81 out of its case — the unit just attaches via a ribbon cable. Although it is very easy to fit it does mean that you have now got two separate units. The keys, typewriter style and angled, don't feel right but the case design is quite attractive in Memotech's blue house colour.

£34.95

Memotech

4

● Memotech's ZX81 Keyboard

● ZXR Push-Button Keyboard for the ZX81

Kick-Key

ZX81

Similar to the ZXR Push-Button Keyboard, but with hard plastic keys and legends in two colours. It sticks on top of the original keyboard, but two ribbon cables have to be plugged inside the computer. The price is a bit high. For a few extra pounds you could buy a "proper" keyboard.

£26.50

Kempston

3

Keyboard overlays Spectrum

Designed for educational software, the Tactile keyframe fits over the Spectrum and takes a series of overlays in several shapes and colours. Tactile produces software to use the overlays.

various

Tactile

Keyboard

Spectrum

Clearly marked keytops — some in five colours — cursor control pad with fire button and four direction buttons are included. Untested, but seems a little expensive.

£53.45

Microtext

3

Keyboard

ZX81

Low-profile keyboard has full-travel keys suitable for touch typing. A full set of legends with clear plastic inserts is provided.

● Fitting Softeach's keyboard overlay

Keyboard overlays Spectrum

A kit to guide you to the right keys for playing games and so on. Ten overlays are provided with two sheets of sticky labels, one already printed and the other left blank for your own labels.

£3.95 Softeach

Keyboards ZX81/Spectrum

A special series of keyboards for physically disabled people includes a model with large keys.

various Possum Controls

Joysticks and joystick interfaces

KRAFT

A squat, oddly-shaped joystick which works quite well. Finished in black, red and silver, it has a fire button on the base. A little expensive, perhaps?

£18.95 Consumer Electronics

Competition-Pro

Although it's starting to age, the Competition-Pro is still a very good joystick. Sturdy and accurate, it has a tapered black shaft and two large red fire buttons on the base.

£14.50 Kempston

Competition-Pro

Short, stubby and easy to use — that sums up this joystick. Similar to the KRAFT model, it is in black with a single fire button on the base.

£13.95 Consumer Electronics

Interface 2 Spectrum

This is likely to become the standard joystick interface. It can take two joysticks and operates on keys 1-0. A ROM cartridge slot is on top and there is a selection of good quality software available on ROMs. A snag is that only the ZX Printer will fit on the rear edge connector because of the size of the slot.

£19.95 Sinclair

● Interface 2 from Sinclair with ROM cartridge game plugged in

Intelligent Interface Spectrum

A programmable interface which will work with any joystick. Unfortunately the program has to be loaded from tape and the keys selected every time you switch on or use a game which uses different control keys. It makes things time-consuming. The design isn't wonderful, but the price isn't too bad for a programmable joystick.

£24 with joystick £29.90 Cambridge Computing

Joysticks Spectrum

These two are mentioned together because they are so similar — the price is the same too — and you may find others of the same design. Both clamp on top of the keyboard and the short joystick moves buttons underneath which depress the cursor keys. Not tested, so rating based on price and supplied details.

£9.95 E.E.C.
Grant Design

A NEW, IMPROVED ZX81 KEYBOARD AT THE SAME OLD PRICE £9.95.

There's only one thing wrong with the ZX81 keyboard.

Or rather its lack of one.

Since it's flat your fingers don't feel as if there's any response to the pressure put on the keys.

ZX81 KEYS

FILESIXTY KEYS

In other words, you're not quite sure which keys you've pressed until the screen actually tells you.

Our new, improved push button keyboard changes all that.

It matches the ZX81 perfectly. And the keys give a real calculator-type feel

To set it up all you have to do is peel off the adhesive backing and stick it on top of the ZX81 touchpad.

Because no tampering or soldering is involved the guarantee is not affected. And it will last for up to 3½ million operations.

But our keyboard doesn't just come loaded with features. With it comes a separate overlay and a set of coloured stick-on labels to make game playing easier.

It's yours for the original price of £9.95

Whichever way you look at it, we think you'll agree that it's a keyboard that's quite outstanding.

FILESIXTY

Filesixty Ltd., 25 Chippinham Mews, London W9 2AN England Te 01 289 3059 Telex 268 048 EXTLDN G 4087

JoySensor

A touch sensitive rockable disc similar to the one used for Intellivision video game units. Includes fire button. A nice design, but an expensive luxury.

£29.95

Consumer Electronics

Quickshot

A very popular joystick, well designed and now available in the High Street chain stores. Black with two red fire buttons — one on top and one on the base. Suction pads hold it firmly while you play, but it is also designed to be comfortably hand held. I found it to be not particularly accurate.

£12.95

Protek

Atari joystick

The original. Very cheap but not very good. The inner plastic shaft does not last and there is one red fire button — which is too small — on the base.

approx £7.50

Atari

Programmable Joystick Interface Spectrum

The best joystick interface now on the market, in my opinion. Programming is done by holding down a key and moving the stick to install. Very easy to program for different games, particularly as the software is on an EPROM and not on cassette.

£24.95

Stonechip Electronics

Interface II/Programmable

Spectrum/XXII

Not very easy to program and the add-on itself looks messy. It involves wiring up to pins in the interface according to which keys your game uses. The advantage is that, being "hard wired", it does not forget when you switch off. Ideal only if you are playing the same make of game all the time. Individual software houses tend to use the same keys for most of their programs.

cursor £20.95

programmable £33.95

Kempston

Kempston Interface

Spectrum

One of the first interfaces and therefore it has become the standard for which most games have an option. Well designed in a neat unobtrusive black case. Tricky to use if you have put a new keyboard around your Spectrum — you will then need an extender board.

£15

Kempston

Master Unit/Fuller Box/Amp Stick Spectrum

All three add-ons include a joystick which works on port 127. An amazing amount of these units has been sold and commercial houses are just starting to realise this. See other sections for more details of individual units.

£54/£29.95/£19.95

Fuller

Joystick Interface Spectrum

Untested, but this interface is probably the cheapest on the market. Kempston compatible, it comes with a two-year guarantee. Ram Electronics says that, unlike some others, its model will allow rapid fire with the new Quickshot II joystick. Offered through mail order and retail.

£9.95

Ram Electronics

Joystick Interface Spectrum

New and untested, this model contains a CMOS RAM, powered by a trickle-charge battery, which can store the names and keyboard details of up to 16 games for three months, say the makers. It can also be used as a pseudo-ROM for regularly-used routines. Accepts Atari-type nine-pin joysticks. Rating based on price and supplied details.

£28.50

Fox Electronics

Can you meet Laserwarp's infinite Challenge?

The package from Addpac Electronics comprises joystick, interface and a demonstration program at a reasonable price. Untested.

£18.99 Addpac Electronics

Pickard Controller ZX81/Spectrum

Allows any Atari-type joystick to be connected to ZX81 or Spectrum and choose your keys. Untested.

controller £20.45
joystick £7.50 Success Services

Joystick

Close to arcade-style joysticks, this has three large push-button controls and 2K of RAM and plugs into the edge connector. Untested.

£43.70 Electrotech

Interface Spectrum

Reasonably-priced interface for Atari-type joysticks, plugs into edge connector. Untested.

£14.95 Protek Computing

Interface kit Spectrum

Plug-in device which arrives as a kit and can accept two joysticks. Untested.

£22.95
joystick £7.99 Midwich

Trickstick Spectrum

There are only two mechanical parts — the small fire buttons — in the Trickstick, a novel replacement for joysticks. You hold it in your fist and move your thumb over two photo-transistors on the top for left-right and your index finger over two more for up-down. Untested, but East London Robotics says it allows proportional speed control and greater accuracy. Kempston compatible, and up to eight can be used simultaneously.

Sound amplifiers, programmable sound generators and speech units

U Speech

Spectrum

One of my two favourite units, mainly because it is so easy to use. It "speaks" the letters and the BASIC keywords as you type them in. S\$ will hold anything you want the unit to say. It is simple to use with your own BASIC programs, by handling the sound in a form of allophones. So you would write hello as HE(LL)(OO). Upper and lower case decide intonation. Some commercial software makes use of U Speech for games. A recently-released example is Bug-Byte's Birds and the Bees. Shaped a little like a black cassette case — and packed with circuits inside — the U Speech unit just plugs into the port. Its one big problem is that you cannot plug anything on the back apart from the speech unit and, possibly, Microdrives. The sound comes out of the TV speaker, so if you use a monitor this will not work with it.

£29.95

Currah

- Currah's speech system — a favourite

ZXS

ZX81/Spectrum

Shaped like a large RAMpack and cased in black plastic, this is a standard type of speech unit using the standard speech chip from Texas Instruments, which means it is controlled with allophones. It needs an external speaker to be heard, but also works by connecting the AUX socket of a cassette recorder or a hi-fi unit.

£32.50

Timedata

ZXM

ZX81/Spectrum

Just like the ZXS, except that this provides three-channel sound through an internal amplifier. There is also a joystick socket and volume control. Sound is average and volume good.

£29.95

Timedata

Fuller Box

Spectrum

A very attractive design, the Fuller Box plugs in flush with the back of the Spectrum and looks as if Sinclair Research had designed it. It adds a joystick interface, cassette interface and the all-important three-channel sound. This sound feature is used by software from Fuller and a few other software companies. However, the sound is rather tricky to use in your own programs. It includes an amplifier with volume controlled by using a screwdriver. The Fuller Box can also be upgraded to the Master Unit (see below) which adds speech.

£29.95

Fuller

Master Unit

Spectrum

Exactly the same as the Fuller Box (above), but with the addition of fairly smooth speech. It also has a socket for an external amplifier, if needed. The price should be a little less, though.

£54.95

Fuller

Amp Stick

Spectrum

Again, the same box as the Fuller Box. But this one contains just the sound amplifier and joystick interface. Good value for money.

£19.95

Fuller

Big Ears

ZX81/Spectrum

A friend of mine has one of these units and says he is quite happy with it. Mind you, after paying more than £50 for it he would look a bit silly if he said it was rubbish! What the unit actually does is recognise your voice so you can speak instructions to your computer. It has to be "trained" to your voice. Possible uses include acting on the word "fire" in your games or controlling peripherals. It won't talk back, of course. The software supplied is hardly good enough to justify buying this unit and it requires a port to use it, I understand. I don't recommend this one.

£55

William Stuart Systems

- Timedata's ZXM sound system

ADS THE ULTIMATE IN PERIPHERALS FOR THE SPECTRUM, JUPITER ACE & BBC MICROCOMPUTERS

"Highest quality peripherals at the lowest possible prices" — that's the philosophy at Advanced Digital Systems. Our team of highly experienced designers use the very latest techniques to produce adaptable home computer peripherals — at a price you can afford.

- Boards are designed using CAD/CAM, giving a neat optimum layout.
- Gold plated connectors are used, wherever possible, to ensure good electrical contact.
- All products carry a 12 month guarantee.
- All units are "Plug in and go"

1 PRINTER INTERFACE 1
Centronics Interface for the Sinclair Spectrum. £34.50 inc. VAT. Comes complete with approx 1 metre of cable, centronics plug and

- Software recognises LLIST and LPRINT enabling Print-outs direct from Basic. Also adaptable COPY routine for graphics printers

2 PRINTER INTERFACE 2
Centronics Interface for Jupiter Ace. £39.95 including VAT and Software
Same unit as the Spectrum Interface but with adapter card.

3 PERIPHERAL INTERFACE 3 — ZX ACE
Package Using the adapter card and the Software supplied the Sinclair ZX Printer can be connected to the Jupiter Ace. Special Introductory Offer £9.95 inc. VAT

4 PERIPHERAL INTERFACE 4
ZX BBC Adapter £24.95 inc. VAT
Enables the connection of Sinclair Peripherals to the BBC Mode B. First Software package included gives an amazingly cheap entry into printing on the BBC mode B by allowing you to use the ZX Printer ideal for listings. Please allow 28 days for delivery. Unit requires 1.2 Amp power supply either the ZX P.S.U. or the equivalent available from us at £5.95 inc. VAT

Chatterbox ZX81/Spectrum

Another add-on in the sound line from William Stuart. But this time instead of understanding your speech, it speaks to you through its own speaker. It uses allophones which are acceptably easy to program. Chatterbox is equipped also with two external amplifier sockets — one stereo and one mono — and has an edge connector for other peripherals. Pretty good, really, but the price is a bit too high.

£55 William Stuart Systems

Soundbox ZX81/Spectrum

The sound version of the Chatterbox (above). Above average three-channel sound and quite easy to program. Nice, but needs an external amplifier.

£27.95 William Stuart Systems

Sweet Talker Spectrum

One of the simplest speech units to use, Sweet Talker has its own speaker. But the speech is not as smooth as some I have heard and the price is a little high. Not Microdrive compatible

£34.95 Cheetah

● Cheetah's Sweet Talker — one of the simplest to use

Add-On Spectrum

A very nice add-on from Micro-Power, including a programmable sound generator, amplifier and joystick interface. The sound is easy to set up and the amplifier is very powerful

Micro Power

● Telesound sends sound to your TV speaker

Telesound Spectrum

A small device which means opening up the case and attaching a couple of wires, reckoned to be a five minute job. An advantage is that it leaves the edge connector free. It then can be used to send sound to the TV speaker for far better quality than the Spectrum beeper. A friend of mine found it tricky to tune to the TV.

£9.95 Compusound

Specsound Spectrum

At only £7, this is pretty good value for an amplifier. It plugs into the load/save sockets, leaving the edge connector free. It has a volume control and an on/off switch and the power is from a battery. It might have been a better idea to take the power from the computer to avoid buying batteries.

£7 Kelwood

● Michael Belk, of Kelwood, with his Specsound

● ZON X from Bi-Pak

ZON X ZX81/Spectrum

The first sound unit I ever owned was the ZON X for the ZX81 and it's still one of my favourites. A very easy unit to program once you get accustomed to the instructions which, although very good, need to be read a couple of times. There is also a volume control knob on the unit.

£25.95
Spectrum adaptor board £6.80 Bi-Pak

Sound Booster Spectrum

Not tested, Zeal's Sound Booster has a 3in loudspeaker, load/save feature to avoid plugging and unplugging plus a volume control knob. Plugs in externally and requires no batteries. Mail order. Rating based on price and supplied details.

£14.99 Zeal Marketing

● Compact Sound Booster from Zeal

Trichord ZX81/Spectrum

Plugs in for music and sound and incorporates a PROM which contains routines to create many effects. Untested.

ZX81 £26.95
Spectrum £24.95 Petron

S-Pack Spectrum

You can call from BASIC programs a total of 71 built-in words, phrases, numbers and letters. And there are three more Word Pack ROMs, at £14.95 each, on sale. Untested.

£49.95 DCP Microdevelopments

● S-Pack, from Microdevelopments, has a built-in vocabulary

Speech Synthesiser Spectrum

Small unit, with speaker, external output and volume control, which works by building up individual sounds until you have complete sentences and words. Includes a how-to-do-it guide.

Spirit Instruments

● Spirit Instruments Speech Synthesiser stands upright when plugged into a Spectrum edge connector

NEW HOME COMPUTER CABINET

SPECIAL OFFER £79.95
incl. VAT & Delivery

Especially designed for your home computer system, whilst also accommodating your video recorder

Our cabinet has been custom designed after intensive consultation with PC users to provide maximum comfort and convenience during those long hours spent slaving over a hot micro

The cabinet includes many features not previously available, and as well as combining the very best aspects of modern furniture design, it provides an ergonomic and practical layout for all the major components of your system

In fact, we are proud to claim that your cabinet will look perfectly at home in your lounge, dining room, or even bedroom

32½" height 36" width 16¾" depth

JUST CHECK THESE STANDARD FEATURES

- 1 Smooth sliding shelf locks in position just where you require it — and neatly glides away after use
- 2 The computer shelf has been designed to allow adequate knee room for you to sit comfortably and will avoid programmers back ache
- 3 Adequate room to position tape recorder, printer, disc drives etc alongside computer for ease of use
- 4 All cables neatly and safely out of sight while allowing all units to be permanently connected if desired
- 5 Lots of storage space for cassettes, cartridges, books, listing paper, joysticks, etc.
- 6 With shelves and doors closed, instantly becomes an elegant piece of furniture
- 7 The lower shelf accommodates all makes of video recorders currently available
- 8 Smart teak effect finish
- 9 Supplied as a flat pack. Very simple to assemble using just a screwdriver. Full instructions supplied

THANK YOU.

"IT LOOKS NICE BUT WHAT THE HELL CAN I DO WITH IT?"

Every ZX SPECTRUM Print'n'Plotter Jotter has 100 pages of finely printed screen grids.

50 for the high resolution screen. 50 for the normal character screen.

With these at your disposal you can plan practically any graphics print-out to program into your computer.

The high-resolution PLOT grid shows every one of the 45,060 pixels! Every one printed. Every one with its co-ordinate numbers. This gives you enormous graphics power to DRAW, PLOT, CIRCLE, PLOT OVER and so on in any position or screen building up graphic drawings, charts, maps... In fact anything without the complications of guesswork, integer out of range, or wrongly positioned pixel colours which change PRINTED INK characters!

The normal character PRINT grids on the other hand will allow you to be specific about PRINT AT, TAB, PRINT OVER, SCREENS and INK / PAPER in direct co-ordination with PLOT... you see every page is printed on high quality tracing paper... ideal to overlay on to illustrations and 'copy' or co-ordinate.

And there's another bonus, because each page contains 24 User-definable grids - 2400 per pad!

With 50 pages of PLOT grids, 50 pages of PRINT grids 2400 user-definable grids, a set of colour pens, a printed PIXEL RULER and our Special Offer of demo programs, IT'S THE BEST VALUE IN ZX GRAPHICS PROGRAMMING.

Post today to Print 'n' Plotter Products, 19 Borough High Street, London SE1 9SE or phone: 01-403 6644 (General) or 660 7231 (Credit Card Sales)

● Camel's memory expansions for the ZX81 offer other features too

Camel's 64K Dream-81 expansion for the ZX81 has an LED to show when power is on, a link option to disable the 0-16K area of RAM and is designed to accept an EPROM as an alternative. ROM-81, a memory expansion unit for the ZX81, enables you to read useful routines and commonly used data stored in an EPROM.

Dream-81 £80.44
ROM-81 £17.20

Camel

● Memotech's high-resolution graphics Memopak sandwiched between Memotech's 32K expansion and a ZX81

Memopaks are a range of ZX81 RAM units which fit neatly along the back of the computer and can be stacked. There are also Memopacks for hi-res graphics, and Centronics and RS-232 printer interfaces

16K £29.90
32K £49.95
64K £79
Others £39.90

Memotech

The ZX Panda, adding 16K, has a power-on LED but no edge connector at the back, but a further 16K can be added inside with a RAM board. Stonechip also makes a range of Spectrum add-ons, including light pen, keyboard, programmable joystick interface and echo amplifier.

£19.95
RAM board £14.50

Stonechip Electronics

16K and 32K RAM packs for the ZX81.

16K £28.95
32K £29.95

Data-assette

16K RAM pack from Audio Computers incorporates feet to bring it up to the same height as the computer and a plastic grip to hold it in place.

£19.95

Audio Computers

Printer interfaces

● Rear view of Sinclair's Interface 1, fitted to a Spectrum

ZX Interface 1 Spectrum

Screws to the underside of the Spectrum, tilting it forward. It controls up to eight Microdrives, has an RS232 interface for full-size printers, joystick interface, and can network up to 64 Spectrums at 100K baud. I would be more impressed if they were more readily available.

if bought with Microdrive £30

Sinclair

TMS ZX81

An RS232 interface enabling the use of "real" printers with the ZX81. Not very easy to use

£32.20

Cobra

RS232 Spectrum

The Spectrum version of the TMS (above).

£33.50

Cobra

RS232/ Centronics ZX81/Spectrum

Two interfaces in one box for both computers and both at the same price. Uses the full width of any compatible printer at a selection of baud rates. Spectrum model has a built-in operating system for word processing and software is planned for the ZX81 to allow word processing and graphics. Untested.

£39.95 Morex Peripherals

● Spectrum and Tandy colour printer-plotter linked by Softest's Interface

Spectrum/Tandy Spectrum

Well-priced and very useful interface allows you to use Tandy's CGP-115 four-colour printer-plotter (£149). It includes machine code software so you can print text, listings, plans, drawings, PCB layouts, charts and a wide range of print sizes. Using the printer's four ballpoint pens — red, green, blue and black — you can overprint in different colours. Additional software, at £5, allows you to dump the screen to the printer. Untested, but well worth the money.

£35 Softest

Centronics ZX81/Spectrum

Complete with a yard of cable and plug and a 12-month guarantee, ADS' interface includes software to recognise LLIST and LPRINT for BASIC listings. Can be used with the Jupiter Ace with an adapter card and additional software. Untested.

£34.50 Advanced Digital Systems

Kempston Centronics Interface Spectrum

The interface I use in preference to the rest. It is very adaptable and you can easily define your own printable characters. I use it as part of a Spectrum-based word processing system

£45 Kempston

Hilderbay Centronics Interface Spectrum

Same features as the Kempston interface (above), but of a different design. Includes mini-word processor software.

£45 Hilderbay

RS232 ZX81

A well-designed, snug fitting interface which holds software in ROM. Finished in Memotech's blue and silver colours, it works very well.

£39.95 Memotech

Centronics ZX81

Similar in style to the RS232 version and works just as well.

£24.95 Memotech

Printer-face Spectrum

Cased like the Master units and Fuller Box, software is in ROM and the unit is very easy to use. Two models for serial or parallel printers. High resolution screen dump program included.

RS232 £35.75
Centronics TBA

ZX LPRINT ZX81/Spectrum

A very good add-on with ROM-based software. Initialised on power-on. As used by Home Computing Weekly.

£53.48 Euroelectronics

● Kempston's Centronics interface

DEPT 9 CAROLINE ROAD, LLANDUDNO, GWYNEDD LL30 3BL TEL: 0492 79026

HAVE YOU BEEN INVOLVED IN A MYSTERIOUS ADVENTURE RECENTLY?

...from TIS, more commonly known as Total Insalvability Syndrome.

This manifests itself in a number of ways, the most characteristic symptoms being a sudden susceptibility to feelings in the world of reality. Other symptoms include a desperate need to play Mysterious Adventure, an overwhelming sense of outer involvement.

Experts believe that TIS is usually contracted as a result of prolonged exposure to Mysterious Adventure, the program caused by opening any of the following files on your computer:

THE GOLDEN BATON, BBC NODE 4 OF THE MOUNTAINS, THE WIZARD AKTIV, PERSEUS AND ANDRO, THE LITTLE INDIAN, THE TIME MACHINE, THE WIZARD AKTIV, PERSEUS AND ANDRO, THE LITTLE INDIAN, THE GOLDEN BATON.

It is important to note that this epidemic is highly contagious and in view of the current worldwide epidemic it would be unwise to attempt resistance is futile.

For more information on this epidemic, please contact the following computer companies, who will be able to provide you with a temporary solution in the absence of a more permanent one.

For BBC Computer, Commodore, Spectrum, Amiga 500, Dragon 32 you can obtain Mysterious Adventure from the following sources:

- 1) THE GOLDEN BATON
- 2) THE TIME MACHINE
- 3) WIZARD AKTIV PART 1
- 4) WIZARD AKTIV PART 2

- 5) THE WIZARD AKTIV
- 6) PERSEUS AND ANDRO
- 7) THE LITTLE INDIAN

Mysterious Adventures

WHAT ARE MYSTERIOUS ADVENTURES?

MYSTERIOUS: (Adjective) - Baffling, full of mystery, strange or unaccountable".

ADVENTURE: (Noun) - "An enterprise full of risk or danger, an experience of unforeseen events endangering the participants life, a gamble on failure or success".

To start with a MYSTERIOUS ADVENTURE is to take a step out of the world of reality and into the world of dreams. Your computer is your guide in these fantastic or treacherous and dangerous world where danger is ever present and solutions to problems seldom come easy.

By typing simple commands a player frequently can talk to your computerise friend and find out what your next actions are to be.

MYSTERIOUS ADVENTURES bring a fresh and reality to the surreal situations which you will find yourself. You will become involved in these strange worlds of the imagination. You will become a quester which may seem to be moving against you. You will feel elated when you overcome obstacles that are so difficult to way. Eventually you will feel overjoyed as you reach the climax of your mission and success is yours.

Any MYSTERIOUS ADVENTURE is of a mission to be taken right up to the last second. Just as Rome was not built in a day, so each Adventure can take a long time to finish in one session. To this end a SAVE GAME feature has been incorporated in each Title Adventure. This means that at any given time during play of an Adventure you can save your progress where it suits you to quit and come back later to continue your details about your present status.

NEW DEVELOPMENTS ON MYSTERIOUS ADVENTURES

Over the past few years, Adventure programs for Computers have almost always been presented in the classic "Text only" mode. For most Adventure players this has decided how the way they prefer to play Adventures. The mental imagery generated by such an approach is limited only by the player's own imagination. One of the main reasons for the "Text only" approach has been the lack of hardware capabilities with respect to Graphics resolution - Pixel Art Adventures could at best be only very limited in scope.

This situation is changing now however, as Brian Howard, author of the MYSTERIOUS ADVENTURES series, has spent many hours incorporating Graphics into the Adventures. By working in close collaboration with John Blacow, a professional Artist, Brian has produced a series of extremely vivid and impressive Adventures. Each MYSTERIOUS ADVENTURE now features a graphic of the text description, partial views of the current location and surrounding objects. As you enter a new location a high resolution colour picture is rapidly drawn. The effect of this is to bring much more reality to the Scenario, you can actually see the situations you are faced with and act accordingly. It must be stressed that each picture has been designed so that it will enhance rather than conflict with your mental imagery. At the simple stroke of a key you can erase the picture and carry on with your Adventure in text only if this is your preference. We are confident that no other Adventure programs can boast such breathtaking realism and imagination combined with the flexibility and ease of play that have made MYSTERIOUS ADVENTURES such a phenomenal worldwide success.

In addition the Adventures now features full sentence decoding as standard. These mean that you are no longer restricted to inputting single or two-word commands. You can now type in whole sentences in more or less plain English. Your computer will quickly advise the sentence and perform a wide string of your commands. Just another feature designed to maximise your enjoyment of these world beating games!

The "New style" MYSTERIOUS ADVENTURES are currently available for the 48K SPECTRUM, COMMODORE 64. More releases are planned this year which will include DRAGON 32, ORIC-1, APPLE II & IIe, ATARI LYNX, MATTEL AQUARIUS, IBM PC etc. Please write or phone for availability.

Utilities

EPROM programmers etc. ZX81/Spectrum

ROM-SP plugs into the back of the Spectrum and holds an EPROM with 8-16K of data. Camel also makes EPROM programmers including Bloprom-81 and the low-cost Promer-81, both for the ZX81. There's also a no-frills RAM card. Untested

ROM-SP £34.44
Bloprom-81 £79.95
Promer-81 £19.95
RAM card £17.35

Camel

● The Microtext MUKBUS Card Frame System

MUKBUS Spectrum

Plugs into the rear edge connector to give a six-slot motherboard to use the range of Microtext interfaces, including a prototyping card. A power supply powers the MUKBUS Card Frame System together with interfaces, Spectrum and two micro floppy disc drives. Cards include floppy disc, RS-232/Centronics, 80-column video, 64K page mapped memory and bar code reader interfaces. Untested

MUKBUS Card Frame £59.95
Power supply £39.95

Microtext

● Time Controller from Glanmire Electronics

Time Controller ZX81/Spectrum

Battery-powered clock for electronic diary with alarm, home controls, burglar alarm, sound effects and process control via eight programmable inputs and outputs. Software is in a PROM. One instruction only is needed to read or write month, day, date, hours, minutes or seconds. Also available: extension connector to add other peripherals. Untested.

ZX81 £34.50
Spectrum £38.50

Glanmire Electronics

FORTH ROM ZX81

Plug-in ROM contains 12K of FIG-FORTH, parallel I/O, multi-tasking FORTH operating system, Z80 assembler for machine code FORTH definitions, modem support, crystal-controlled baud rate generator for the RS-232 interface, machine code monitor, RS-232 and Centronics printer routines and 4K of additional ROM for future enhancements. Untested. Spectrum version due soon.

£67.85

David Husband

● U-Microcomputers' expansion bus with cards fitted

Expansion bus cards Spectrum

USP-232D card is a dual channel serial interface using Z80-DART processor. Includes software for LLIST and LPRINT and dumb terminal emulator and a 56-page manual. USP-I/O, a general purposes parallel interface, provides 16 output or input lines for uses such as plotters, music synthesizers, digital-analogue-digital converters, printers. Further cards also available, along with expansion bus. Untested

USP-232D £34.50
USP-I/O £29.90

U-Microcomputers

SIMPLY CREATIVE

Now available for
the BBC Micro
and ZX Spectrum

The RD Digital TRACER

High resolution colour graphics facilities on micros provide outstanding opportunities for creative presentation of complex or irregular images. Maps, technical drawings, illustrations, even personalities can be accurately reproduced. But full use of these facilities is inhibited by the tedious and time-consuming plotting of individual coordinates.

The RD Digital Tracer solves the problem of tedious plotting by providing genuinely instant transfer from original drawings to display file. But a Tracer does more than that...

● Instant Full Colour Image Transfer and Scaling

Faithful reproduction of any shape is produced on display file immediately, simply by moving the head of the Tracer over the original outline. Fast PAPER and INK colour change is provided. The software also includes an infinitely variable scaling routine.

● Special Constructions

Circles, lines, angles and rectangles can be rapidly sampled and applied, based on any two Tracer input points. So windows and wheels, bar charts and frames, and so on, can be added to outlines within seconds.

● Colour Fill and Texture

Fast colour fill, or a choice of colour hatching can be added within outlined areas on the display.

● Text and Symbol Positioning

Text, or user-defined symbols, can be positioned as desired, under the control of the tracing head.

● Display, Print, SAVE and Re-trace

Besides colour display, drawings may be printed, and SAVED on cassette (or video recorder). And with the re-trace routine amazing animated presentations can be made.

Unretouched hard copy from ZX printer.

The RD Digital Tracer is supplied with connector, interface software cassette, and full instructions on use. It is available from Spectrum and other computer shops or direct from RD Laboratories.

BBC Micro Tracer

This Tracer version operates with the BBC Micro Model B, or suitably converted Model A computers. It is suitable for all graphics modes including Teletext, and a "colour palette", which can be modified whilst the program is running, removes the user of complex GCOL colour specification. Accuracy to 1% is achieved over a full A3 tracing area. Software is provided for both serial and parallel printers. The price of £69.95 includes P&P and VAT. (UK only.)

ZX Spectrum Tracer

The ZX Spectrum Tracer (compatible with ZX81) operates with all ZX Spectrum variants and accessories, including Sinclair printer and Microdrive. Original areas up to A4 may be traced with a typical accuracy better than 2%. The price of £55.50 includes P&P and VAT. (UK only.)

● This EPROM board for the Spectrum costs £19 from EPROM Services

EPROMs etc. ZX81/Spectrum

Among the range of add-ons from EPROM Services is an EPROM board for up to 8K or 2K EPROM or 2K RAM ICs. Also for the Spectrum is an Auto-Start unit which gives an automatic jump to location FD00 HEX on switch-on. ZX81 EPROMS include rapid load/save, tool kit, disassembler, graphics, character set, monitor and others. Untested.

EPROM board £19
Auto-Start unit £9.95
ZX81 EPROMs £9.95-£19 EPROM Services

EPROM - Card Spectrum

Plugs inside to add 10 extra routines, including re-numbering, editing, character moving and variable dumping. Untested

£9.95 Orme Electronics

MX-8 ZX81

Two functions controlled by on-board switch: storage of up to 10 programs to a total of 6K, plus 6K of extra RAM. Software in a 2K EPROM provides a monitor for system status. Untested

£44.90 Micro-Z

Miscellaneous

Microdrive Spectrum, Interface 1

I hardly need to explain this one; I'm sure you have already drawn your own conclusions. To summarise: uses quarter-inch video-style tape to store around 90K in tiny cassettes, 48K can be loaded in a claimed nine seconds, typical claimed access time 3.5 seconds, up to eight can be linked. Powered from the Spectrum, a red light shows when they are running. Not compatible with the Microdrives built in on the new QL micro. Cartridges are £4.95 each. At present both Microdrives and cartridges are available only from Sinclair. Each Microdrive includes a cartridge with a sample program

£49.95 Sinclair

Digital Tracer

ZX81/Spectrum

You can move an arm across a tracing sheet to "trace" your own designs, put them on the screen and save them to tape. Pretty accurate and well designed. But leave plenty of desk space before you start

£55.50

RD Labs

Micronet 800 Spectrum

The VTX 5000 modem, now in the shops and proving popular, connects your Spectrum to both Micronet and Prestel. Micronet can be pretty expensive to run for any amount of time because of phone charge, particularly during office hours, but ROM software is built in to allow you to easily download pages and "free" software to tape or Microdrive.

£99.95 plus local call costs

Micronet 800

Zeaker ZX81/Spectrum

A "buggy" which has more use in schools than in the home. Programmed in LOGO, it can be made to trundle around. A relatively inexpensive introduction to robotics.

£69.95

Colne Electronics

Power Supply Regulator and Buzz Omitter ZX81/Spectrum

A silver-coloured box about the size of a cigarette packet which fits between the power supply and the printer. It stops the Spectrum "buzz" and cures overheating problems found in the Sinclair machines

£8.95

P. R. Electronics

● Up to eight Microdrives can be linked together

Solar SOFTWARE

COSMIC FIREBIRDS

This must be the most spectacular arcade action game ever to be produced on cassette for the 8 or 16k expanded VIC 20.

As captain of a star ship lost in space, you encounter a miraculous force of winged creatures, known to the galaxy as the COSMIC FIRE BIRDS. They loop the loop. They figure an eight. They swoop. They dive. can YOU survive. Full screen display, 99 progressive levels of play, 5 lives. Bonus ship at 5,000 points, swimmers, bombers, leaders, hawks.

This is arcade action like it's never been seen before. 100% M/C. Superb colour graphics and sound.

D. Fritsch

5

Cables **Spectrum**

A range of ribbon cables, 9-12ins, with 56-way connectors which could be used, for example, to separate RAMpack from the computer. Also paddle board to convert female connector to male. Untested.

£4.99-£9.49
paddle board £1.99

Hawni Electronics

4

Monicron **ZX81/Spectrum**

Designed for reliable and easy loading and saving to tape, both models feature an on-off switch and the Spectrum version has a built-in amplifier. An enhanced Spectrum model has a 2 watt amplifier and socket for external speaker. Untested.

£15.95
enhanced £16.75

MacQuillan Electronics

3

- Plug in for high resolution with Digital Integration's unit

High Resolution Graphics Pack **ZX81**

Contains a 2K EPROM holding the hi-res BASIC monitor to control a 256 by 192 pixel screen, with every pixel accessible. Commands like PAGE, PLOT and SCROLL can be used to define characters, draw and plot. There is also a complete lower-case character set for word processing — but you would be well advised to buy an extension keyboard to use this feature. Compatible with ZX Printer. Schools discount. Untested.

£38.95

Digital Integration

4

Battpack **ZX81/Spectrum**

Said to eliminate problems caused by varying voltage, Battpack comprises a rechargeable nine volt battery and transient suppressor. Untested.

£13.95

Adaptors and Eliminators

3

Masterplug **ZX81/Spectrum**

Allows four devices to be connected — for example, TV, recorder, computer, printer — to one mains outlet. Supplied with 1.5m mains lead with plug and four other plugs. Inexpensive. Untested.

£10.99

H & K Supplies

4

Arab RAM **ZX81**

Fits between the ZX81 and a RAMpack to give a complete set of characters, keywords and functions in an Arabic version of BASIC called Saudia. Writing and evaluation of decimal numbers is from right to left. Includes instruction booklet and keyboard overlays are available.

n/a

Autoram

● Arab RAM gives an Arabic version of BASIC

Light pen **Spectrum**

Easy to use and inexpensive. Plugs into the ear socket and uses 16 commands, chosen from an on-screen menu. Among the features: change colour — border, paper and ink — draw circles, boxes, lines, fill, insert text, draw freehand. Five screens can be stored on the 48K Spectrum and used to simulate a sort of animation

£19.95 dk'tronics

Floppy disc card **Spectrum**

Card which, says Technology Research, will work with any Shugart standard disc drive or Micro Disc 1 drives.

n/a Technology Research

High-resolution board **ZX81**

Fits between computer and screen to give a fully-programmable 256 by 192 resolution on screen, says Digital Integration. Uses 6.5K and has its own 2K EPROM. Untested

£38.95 Digital Integration

ZX Tape Loader **ZX81/Spectrum**

Small box with a meter and three-position switch for Load, Off and SAVE plus an LED which indicates when the switch is in Load position. Needs a PP3 battery. It can be left in position permanently. In tests by an HCW reviewer, it loaded and saved perfectly several old tapes previously put aside as unloadable.

£14.99 Elinca

Floppy disc controller **ZX81**

Analogue says its floppy disc controller is compatible with single or double density Shugart 5¼in drives, the Japanese 3in drives and the 3in MCD Hungarian drives.

£40 approx Analogue

Printers

ZX Printer **ZX81/Spectrum**

Quality leaves a lot to be desired, but the ZX Printer needs no power supply — it plugs straight into the back of the computer — and is very cheap. It works by spark erasure on metallised paper 4½in wide.

£39.95 Sinclair

● ZX Printer — the original

Alphacom 32 **ZX81/Spectrum**

Faster, quieter and clearer than the ZX Printer — but at £20 more. The Alphacom 32 is imported from America where it is used with the Timex version of the ZX81. Unlike the Sinclair model, it uses its own power supply (supplied). It supports all the Sinclair commands and prints in blue on white paper in slightly thinner and taller characters. The paper is much cheaper: £1 for a 25m roll. Untested.

£59.95 Dean Electronics

● From America, the Alphacom 32 printer

Transform your Spectrum now!

The FDS Keyboard is the best selling Spectrum keyboard in the world. The FDS Keyboard is the only keyboard with its stylish, slim-line appearance gives you the look and feel of a real typewriter.

The keyboard is designed to help you enter data with lightning fast accuracy. The keyboard has all the special characters of your ZX Spectrum plus additional function keys. It has 4 cursor control keys, a delete rub-out key, a separate key for full stop and comma, a full length space bar, shift keys either side and 2 function keys for direct entry into green and red E modes.

The microdrive is easily adapted to go inside along with the power supply. Fixing is simplicity itself, no soldering or technical knowledge is required. For the user who is reluctant to install his Spectrum circuit board inside the FDS, a buffer is available (£2.75 + 50p p&p) which simply plugs into the expansion port and connects directly to the FDS Keyboard, allowing the whole cased Spectrum to be installed inside.

£49.95
(£2.50 p&p)

HEARING IS BELIEVING Tele Sound SPECTRUM BEEP BOOSTER

TELESOUND is ready built and tested so that you can get the full sound of your Spectrum through any unmodified television set, black and white or colour. The unit is easy to fit in minutes without any previous experience as full fitting instructions are provided.

TELESOUND has been designed using the very latest ultra miniature components so it's size is an incredible 2x1.3x 1cm. and fits neatly inside the Spectrum. Three easy push-on connections are made to the Spectrum. The connections are clearly shown in a diagram that comes with full fitting instructions

TELESOUND FEATURES

- SOUND AND VISION TOGETHER FOR ADDED REALISM
- BEEP VOLUME CONTROLLABLE FROM A WHISPER TO A ROAR
- KEYBOARD CLICK CLEARLY HEARD TO ASSIST PROGRAM ENTRY
- PROGRAMS CAN BE HEARD WHEN BEING LOADED • NO SOLDERING OR CASE CUTTING REQUIRED
- ADDITIONAL AMPLIFIER NOT NECESSARY • SEPARATE POWER SUPPLY NOT REQUIRED
- USES NO MEMORY SO WORKS WITH ALL PROGRAMS • COMPATIBLE WITH ALL OTHER ADD-ONS INCLUDING MICRODOME

TELESOUND comes complete with easy to follow fitting instructions and costs £9.95 inclusive of post, packing etc. Please state your computer when ordering
